

MINEHUB TECHNOLOGIES INC.
Management's Discussion and Analysis
For the six months ended July 31, 2022 and 2021

This Management Discussion and Analysis ("MD&A") is an overview of the activities of MineHub Technologies Inc. (the "Company" or "MineHub") and its subsidiaries for the six months ended July 31, 2022 and 2021. In order to better understand the MD&A, it should be read in conjunction with the Company's condensed consolidated interim financial statements and related notes for the six months ended July 31, 2022 and 2021 and audited consolidated financial statements and related notes for the years ended January 31, 2022 and 2021.

All dollar amounts referred to in this MD&A are expressed in Canadian dollars except where indicated otherwise. The effective date of this MD&A is September 26, 2022. This MD&A contains statements that constitute "forward-looking statements" and other cautionary notices (refer to "Forward Looking Statements and Estimates" on page 6).

DESCRIPTION OF BUSINESS AND OPERATIONS

The Company was incorporated on February 19, 2018 under the laws of British Columbia and has its registered office at 1008-550 Burrard Street, Vancouver, BC, Canada. The Company's head office is located at Suite 717, 1030 West Georgia Street, Vancouver, BC, Canada.

The Company's principal business is the development and operation of a technology platform for digital trade for the global mining and metals supply chain and related enterprise solutions. On September 7, 2021, the Company's common shares began trading on the TSX Venture Exchange ("TSX-V") under the ticker MHUB and in November 2021 on the OTCQB under the ticker MHUBF.

Since March 2020, the outbreak of the novel strain of coronavirus, specifically identified as "COVID-19", has resulted in governments worldwide enacting emergency measures to combat the spread of the virus. These measures, which include the implementation of travel bans, self-imposed quarantine periods and social distancing, have caused material disruption to business globally resulting in an economic slowdown. Global equity markets have experienced significant volatility and weakness. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions. The duration and impact of the COVID-19 outbreak is unknown at this time, as is the efficacy of the government and central bank interventions. It is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and conditions of the Company and its operations in future periods.

Technology Platform

On July 3, 2018, the Company, along with a syndicate of strategic industry partners including Goldcorp Inc., ING Bank NV, Ocean Partners (USA), Inc), Wheaton Precious Metals Corp. and Kutcho Copper Corp. agreed to the terms of a syndicate letter. Under the terms and conditions of the syndicate letter, each syndicate member was issued 1,500,000 common shares in the capital of the Company in consideration for the provision of technical input and assistance to the Company for a two year period on a reasonable as needed basis, with the shares vesting over a three year period.

On December 18, 2018, the Company entered into an agreement with IBM to collaboratively develop the MineHub Platform to track and trace minerals from miners to end buyers. The Company has engaged and has been working with IBM Nederland B.V. and other various vendors to continue in the development process of the MineHub Platform.

Following the continued development of platform enterprise solutions, on May 17, 2022, MineHub announced that it now supports the full seaborne market by enabling container-based transactions and shipments on its blockchain-based platform for supply chains. By using the MineHub solution, users get real-time visibility of the location of their container shipments and other data points like shipment status and crucially, estimated time of arrival.

On May 24, 2022, the Company and TradeGo Pte Ltd ("TradeGo") announced that they had entered into a strategic cooperation agreement. The collaboration will focus on the application of blockchain technology in international bulk commodity chains, including cross-platform integration, business model exploration and alignment and developing new use cases for cross border trade with China. TradeGo is China's leading

blockchain-based commodity trading platform. The platform provides efficient, safe and reliable solutions for digital trade finance, like electronic bills of lading and warehouse receipts for clients in commodity supply chains across the sectors of energy, chemistry and metals within China.

On July 5, 2022, the Company announced that it had entered into a commercial agreement with BHP, whereby BHP, a global resources company, will subscribe to the MineHub platform as part of its operations and business network and on August 16, 2022 the Company announced that it had entered into a similar arrangement with Sumitomo Corporation of Japan.

Full details of the launch of its latest enterprise solutions and agreements are contained in news releases available on the Company's website and on SEDAR on www.sedar.com.

Financings

On April 1, 2022, MineHub closed a private placement for gross proceeds of \$3,150,000. The Company issued 3,500,000 units at a price of \$0.90 per unit. Each unit is comprised of one common share and one half of one share purchase warrant. Each warrant is exercisable into a common share for 2 years at a price of \$1.50 per common share. The Company paid cash fees of \$146,250 to eligible finders and issued 162,500 non-transferable finder warrants having the same exercise terms as the purchaser warrants.

On January 21, 2021, the Company had entered into a convertible promissory note agreement to borrow an amount of \$500,000, maturing in one year and bearing interest of 15% per annum. On September 1, 2021, the lender converted \$125,000 in principal and \$8,305 in interest in exchange for 266,600 common shares and on February 1, 2022, the remaining \$375,000 of the principal was converted into 750,000 common shares. The remaining \$48,647 of accrued interest was paid in cash.

OVERALL PERFORMANCE

MineHub has incorporated with the view to developing a platform for digital trade in the mining and metals supply chain built on blockchain technology. The Company's activities to date have been focused on progressing the development of the program and related enterprise solutions. Since incorporation, the Company has financed its growth through equity and debt financing. To date, the monies raised have been expended on the development of its programs and corporate overhead costs.

The performance of the company to date has been dictated by the extent of development activities in the periods under discussion and do not necessarily indicate future trends in spending or financial requirements. The Company has recorded losses in each of its three most recently completed fiscal periods and expects to continue to record losses until such time as its platform is fully commercialized.

SELECTED FINANCIAL INFORMATION

Travel	30,137	-
Foreign exchange loss	19,383	5,659
Loss for the period	\$ 2,178,536	\$ 1,872,987

The overall increase in expenditures in 2022 compared with 2021 resulted from increased development and general corporate activities consequent to the listing of the Company on the TSX-V and financings, which allowed the Company to expand its operations.

The Company employed additional staff in 2022, hence the higher payroll and consulting costs in 2022 compared to 2021, as the Company utilized more staff and consultants in development activities. External development costs decreased accordingly. Finance and interest expenses relate to debt financing raised in prior fiscal periods and other financing costs described above. Office costs increased due to increase corporate activity while professional fees decreased, due to fees associated with the TSX-V listing and other transactions being incurred in 2021 with no such costs in 2022. Stock-based compensation relates to the valuation of stock options granted to directors, officers, employees and consultants.

Foreign exchange (gain) loss	14,128	(7,991)
Loss for the period	\$ 4,738,765	\$ 3,433,782

Rationale for the changes in the first two fiscal quarters of 2022 compared with 2021 are similar to those explained above for the second quarters of each fiscal years.

SUMMARY OF QUARTERLY RESULTS

Quarter ended	Net loss	Net loss per share (Basic and diluted)
July 31, 2022	\$ (2,178,536)	(0.03)
April 30, 2022	(2,560,229)	(0.04)
January 31, 2022	(3,360,100)	(0.06)

October 31, 2020	(1,191,483)	(0.03)

The variances in the quarterly net losses resulted generally from variances in contractual obligations related to development costs incurred in the relative quarter.

CAPITAL RESOURCES AND LIQUIDITY

The Company's activities have primarily been funded to date through the issuance of Common Shares pursuant to private placements and various loans as mentioned above. As at July 31, 2022, the Company had cash of \$1,499,133 and working capital of \$1,070,088.

The Company used \$4,408,887 of cash towards operating expenses during the six months ended July 31, 2022, compared with \$2,315,363 in the comparative fiscal period of 2021. The Company raised an aggregate of \$2,967,024 in net proceeds from non-brokered private placements and other funding during the six months ended July 31, 2022 after repaying a short-term debt of \$48,647 (2021 - net \$2,000,050) as described above.

Management's Discussion and Analysis
For the six months ended July 31, 2022 and 2021

The Company will need additional funding for its project, corporate and overhead expenses in the near future. Management is continually assessing the Company's cash needs and potential sources of financing but recognizes there may be some difficulty obtaining such financing due to the current market conditions. There can be no certainty that such additional funds may be raised when required.

RISKS AND UNCERTAINTIES

Due to risks and uncertainties, including the risks and uncertainties identified below and elsewhere in this MD&A, actual events may differ materially from current expectations.

The Company currently depends on raising additional capital to fund ongoing operations. There can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favorable. Failure to obtain such financing could result in a material adverse effect, delay or indefinite postponement of further exploration and development of our projects. Further, any additional financing by the Company may subject existing shareholders to substantial dilution.

Technology companies face a variety of risks and, while unable to eliminate all of them, The Company aims at managing and reducing such risks as much as possible. Few Companies with new innovative projects successfully achieve commercial implementation, due to factors that cannot be accurately be predicted or anticipated, and even one such factor may result in the economic viability of a project being detrimentally impacted such that it is neither feasible nor practical to proceed.

The Company is at risk from changes in general economic conditions and financial markets, changes to favorable tax incentives, grants, loan guarantees and investment tax credits, changes in technology, and operational hazards in the Company's development activities, the timing and availability of financing, governmental and other approvals, and other risk factors listed from time to time by the Company. The Company may have difficulty in attracting and retaining suitable employees. These factors may impact upon the Company's ability to finance its programs and to carry out operations.
